EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Randy Tung on 2-3-05.

The application has been amended as follows:

Claims 8-20 which were previously withdrawn from consideration are now canceled.

Response to Amendment

2. The amendment after final rejection filed on 1/25/05 has been entered. In response to the applicant's remarks the examiner acknowledges the cancellation of rejected claims 1 and 2 and that claim 4 has been amended to now depend from the indicated allowable claim 3. The examiner also acknowledges that because claims 5-7 depend on claim 4, therefore they now depend from the indicated allowable claim 3. In light of these amendments the examiner withdraws the previous rejections related to claims 4-7 because of their previous dependency on rejected and now canceled claims 1 and 2.

Allowable Subject Matter

3. Claims 3-7 are allowed.
4. The following is a statement of reasons for the indication of allowable subject matter:
5. With respect to claim 3, the prior art of record apparently fails to contemplate a system that relies on two heat exchangers, one for the incoming air to preheat the hydrogen and a second to cool the incoming air. The prior art does allow for the suggested inclusion of one or the other as previously stated in the withdrawn 35 U.S.C. 103(a) rejection (paper No. 20041115), but not both in the same system. Furthermore the prior art that does disclose the use of two heat exchangers apparently relies on the exhaust stream to preheat the fuel stream. And because claims 4-7 now depend from claim 3, the same structural features exist and therefore the additional features recited are no longer obvious to one of ordinary skill in the art.
